You're in the business of providing solutions, not just selling replacement parts. As experts in commercial controls and equipment, your contractors value your expertise to help them prove the value of solutions that address building performance issues. Commercial contractors want to know, "what's the return on my investment?". The *BuildingAdvice™* systems deliver automatic ROI calculations, one of its most power features.

Partner with AirAdvice to grow your business. Our *BuildingAdvice™* system can give your contractors a turnkey sales program proven to uncover more opportunities for your solutions.

With *BuildingAdvice™* system, you get a complete program of products, services, and support. Not only do you get the latest building performance assessment technologies available on the market, but also the training and technical support to develop the channel by improving contractors' selling skills. Like you, we're in the business of providing solutions, not just selling parts.

Your contractors can use the *BuildingAdvice™* system to uncover hidden performance issues. The system wirelessly monitors buildings and automatically generates a comprehensive performance assessment report. The *BuildingAdvice™ report* provides key stakeholders of the building with the information they need to clearly understand the operational effectiveness of the building, and to make the project a go. With *BuildingAdvice™* you will get:

- Current energy usage and analysis of conservation measures identified.
- Financial analysis of conservation measures.
- Comfort and ventilation issues related to mechanical system operations.
- Verification of equipment run times and performance

Taking this information, contractors can demonstrate the need to improve or replace controls and HVAC equipment. To receive a free sample of the *BuildingAdvice™* report, contact us at **1-866-247-4800**.

Realize the benefits of the latest building performance diagnostic technology. Call us at **1-866-247-4800** to learn more how you can become part of our distributor network.
